

# RACEWAY PROJECT PLANNER

You can use this project planner to plan your raceway project in 3 easy steps:

1. Select your Wiremold application
2. Measure for your project
3. Build your parts list

## Select Your Wiremold Application

Use the chart below to determine which Wiremold solution is best for your application.

APPLICATION	FLAT SCREEN COVER	CORNERMATE	CABLEMATE	CORDMATE II	CORDMATE	CORDUCT	PLUGMOLD TOUGH	PLUGMOLD	METAL RACEWAY	NONMETALIC RACEWAY
	Home Theater Cabling	•	•	•	•	-	-	-	-	-
Lamp Cords	-	•	•	•	•	•	-	-	-	-
Extension Cords	-	•	•	•	•	•	-	-	-	-
Phone Wire	-	•	•	•	•	•	-	-	-	-
Video Cable	•	•	•	•	-	•	-	-	-	-
Stereo Cables	-	•	•	•	-	•	-	-	-	-
Computer Cables	-	•	•	•	-	•	-	-	-	-
Power Wiring	-	-	-	-	-	-	•	•	•	•
Fan Wiring	-	-	-	-	-	-	-	-	•	-
Power Strip	-	-	-	-	-	-	•	•	-	-
On-wall	•	•	•	•	•	-	•	•	•	•
Over-floor	-	-	-	-	-	•	-	-	-	-

# MEASURE FOR YOUR PROJECT

- Draw a diagram of your project in the grid below.
- Measure the distance for wall-to-wall or wall-to-ceiling runs.
- Enter the measurements in the corresponding segments of your diagram.
- Identify the type and number of elbows and fittings you need.
- Add your measurements to get a total estimate for the length of the raceway you need.
- Enter the information in Your Parts List below.

Notes:

More saving. More doing.®

# BUILD YOUR PARTS LIST

- Enter the information for your project in the appropriate fields below.
- Refer to the sample layout to identify the type and number of elbows and fittings you need.
- When making your purchase, be sure to buy components from the same system (e.g., metal raceway, nonmetallic raceway, etc.).

FOR ON-WALL WIRING:		
ITEM	PART #	# OF PIECES
<b>WIRE CHANNEL</b>		
<b>Boxes</b>		
Starter/Outlet Box	_____	_____
Deep Outlet Box	_____	_____
Extra Deep Outlet Box	_____	_____
Circular Fixture Box	_____	_____
<b>Elbows</b>		
Flat Elbow	_____	_____
Inside Corner	_____	_____
Outside Corner	_____	_____
<b>Fittings</b>		
T-Fitting	_____	_____
1/2" Box Connector	_____	_____
Conduit Connector/Fitting	_____	_____
Accessory Pack	_____	_____

## PROJECT TIPS:

- Estimate the total length of your system and whether you have inside/outside corners, wall-to-wall or wall-to-ceiling runs.
- Determine type and number of additional outlet/switch boxes you need.
- Be sure to buy components from the same system (e.g., metal raceway, nonmetallic raceway, etc.).
- Before doing any electrical work, always turn off power to the circuit.

More saving. More doing.®
