# HOW TO MAKE AN ADVENT CALENDAR

## PROJECT GUIDE

### STEP 1

Use the yardstick to measure your board. Lay the board flat, lay the yard stick across the board, and make marks at 4, 8, 12, and 16 inches. Do this across each board.

### STEP 2

Hammer one nail into each of the marks you have measured out. You should end up with 24 nails in total.

### STEP 3

Use the paper key tags to add the dates to your calendar. Write out the numbers 1 through 24 on the tags. Then attach the tags to your ornaments to coordinate with each day of Advent.
