

HOW TO MAKE A STAR CARD HOLDER

PROJECT GUIDE

DIFFICULTY: EASY
DURATION: 1 HOUR

WHAT YOU NEED FOR THIS JOB

- Completed Advent Calendar Board
- Five Nails
- Hammer
- Twine
- Clothespins
- Ruler
- Pencil

HOW TO MAKE A STAR CARD HOLDER

PROJECT GUIDE

STEP 1

Use the five nails to hammer in the points of the star. It's important to not hammer the nails in all the way. Leave about half an inch above the board. The top nail will be on the top board, centered at 10 inches from each edge. The next two nails will be on the third board down at one inch in from the sides. The last two nails will be on the bottom board at two inches in from each side.

STEP 2

Use the twine to create the star shape. Start by tying the twine to the bottom left nail. Then take the twine up and wrap it around the top nail. Next take it down to the bottom right nail. Then up to the left middle nail. Then across to the right middle nail. Finally, take the twine back to the bottom left nail and tie it in place.

STEP 3

Now your board is ready. Add all your holiday cards using the clothespins, and enjoy your fun new card holder.
